Architecture Research
Finding Information about a House
libraires.udmercy.edu

Searching for Books and Electronic Books

To find books in the library, start at the library homepage. If the house is well known, there might be a chapter written about it in a book or it could even have its own book.

- Type "Farnsworth House" into the search box. If you put quotes around the words it will search for the words together.

The catalog searches for books AND articles.

- To narrow to just books, click the Books filter on the right side under Material Type

If you are having trouble finding a book on your house, search for books on the architect or the architectural firm – ex. Ludwig Mies van der Rohe, OMA
The architectural style – ex. Modernism, international style
The country or region - ex. Danish houses, houses of the Netherlands

Since the table of contents and the index does not display for every book in the catalog, you may have to search through the actual book to see if your house is in it.
In this case, there is an entire book about the Farnsworth House. It’s located on the 2nd floor in the architecture collection. Use the call number to find it on the shelf.

- Click the title of this book for more information

There happens to be a whole chapter in this book on the Farnsworth House

Further down on the results list is an electronic book about the architect of the Farnsworth House, Mies van der Rohe.
