XF Policy

A grade of XF will be assigned when the instructor has no record of a student ever attending class although the student is still officially registered for the course and has never withdrawn. XF grades are permanent grades and count in the student’s GPA as an F or failure for the course. These grades are used in the calculation for academic standing at the end of each semester and may contribute to academic warning, academic probation or academic dismissal from the program.

Students who attend any classes during the semester should not be issued an XF grade. Those students should receive the appropriate letter grade with a last date of attendance. XF grades may also impact financial aid because the student never attended the course.

Approved 11/3/11
Effective Fall 2012
